#### [TSD Products Security Advisory](#) 2009-10-30

##### [Cisco Security Advisory: Cisco IOS HTTP Server Query Vulnerability](#) 2006-03-17

A defect in multiple releases of Cisco IOS software will cause a Cisco router or switch to halt and reload if the IOS HTTP service is enabled, browsing to "http://router-ip/anytext?" is attempted, and the enable password is supplied when requested.

##### [Cisco Security Advisory: Cisco Telnet Denial of Service Vulnerability](#) 2004-12-31

Data Link Switching (DLSw) and protocol translation connections may also be affected. Telnet, reverse telnet, RSH, SSH, DLSw and protocol translation sessions established prior to exploitation are not affected. All other device services will operate normally.

##### [Cisco Security Advisory: Cisco IOS Software TCP Initial Sequence Number Randomization Improvements](#) 2004-01-07

Workarounds are available that limit or deny successful exploitation of the vulnerability by filtering traffic containing forged IP source addresses at the perimeter of a network or directly on individual devices. This notice will be posted at <http://www.cisco.com>.

##### [Cisco Security Advisory: IOS HTTP Authorization Vulnerability](#) 2003-09-23

When the HTTP server is enabled and local authorization is used, it is possible, under some circumstances, to bypass the authentication and execute any command on the device. In that case, the user will be able to exercise complete control over the device.

##### [Cisco Security Advisory: Cisco IOS ARP Table Overwrite Vulnerability](#) 2002-07-22

# Downloading Your Software – Proceed with Download

The screenshot shows the Cisco Download Software interface. The top navigation bar includes 'Solutions', 'Products & Services', 'Ordering', and 'Support'. The main content area is titled 'Download Software' and 'Download Cart (5 items)'. The cart details section lists five items, each with a plus icon and a filename. Below the cart items are buttons for 'Select Another Product' and 'Proceed'. The 'Tools & Resources' section includes links for 'Tools' and 'Resources', and a 'View All' link. On the right side, there is an 'End User License Agreement' section with a list of five terms and two buttons: 'Agree' and 'Decline'. An orange callout bubble on the left says 'Proceed to download up to 25 software images...' and another on the bottom right says '...with just one license agreement'.

**Software Download Rules - Please Read Carefully**

By clicking "Agree" below, you agree to each of the following:

- That you shall be bound by Cisco's End User License Agreement for the software you download from this web site.
- That you are only entitled to download Cisco software and/or signature file for which you have paid for.
- That you must purchase a Cisco Operating License for the software not included in your initial license;
- That you have a current and valid service contract for downloading software and/or the software you are downloading;
- That Cisco reserves the right to: (a) charge you a fee, and (b) immediately suspend or terminate your access to the software.

# Using Personalized Features – “Make it Personal” From One Location

The screenshot shows the Cisco My Cisco website interface. At the top left is the Cisco logo. Below it are navigation tabs: Solutions, Products & Services, Ordering, and Support. A search bar is visible at the top right. The main content area displays 'Cisco 891W Integrated Services Router' and 'Download Software'. A breadcrumb trail reads: 'Cisco > Products & Services > Cisco 891W Integrated Services Router > IOS Software > 12.4.10b-JDA3'. A callout bubble points to the 'My Cisco' button with the text: 'Get one-stop access to your essential support information'. Another callout bubble points to the 'Save a device' button with the text: 'Save a device'. A third callout bubble points to the 'Set alerts' button with the text: 'Set alerts'. The left sidebar contains a navigation menu with items: HOME, SUPPORT, PRODUCT/TECHNOLOGY SUPPORT, Download Software, General Information, Reference, Design, Install & Upgrade, Configure, and Maintain & Operate.

A few clicks let you save a device, set alerts, and get one-stop access to your essential support information.

# Using Personalized Features – Save Devices and Set Alerts

Save any device (product and software) to see a custom troubleshooting dashboard on every visit, and set notifications to get timely alerts.
